
Streamline the Entire Contract Lifecycle

As a company grows, its legal department can become strained by increasingly higher volumes of agreements. Executives from sales to the CEO demand fast turnarounds to generate business and maintain vital revenue flow. Legal departments are often also responsible for ensuring that internal operations such as compliance, procurement and HR are controlled and executed consistently. Managing these deliverables efficiently with minimal staff expansion can be challenging. The DocuSign Agreement Cloud™ helps corporate legal departments be valued business partners within the organization, with solutions to help save time, increase productivity, reduce risk and improve governance.

Ensure enforceability of signed agreements

Electronic signatures are lawful for most use cases in most jurisdictions around the globe. DocuSign secures your electronically-signed documents with a tamper-evident seal and provides a court-admissible Certificate of Completion containing party names, email addresses, public IP addresses and a time-stamped chain-of-custody audit trail that records all activity. DocuSign also offers a wide range of digital certificate and signer identification options, to meet industry-and jurisdiction-specific standards worldwide.

Reduce contract errors and accelerate turnaround time

Automate and streamline the preparation, execution, and management of agreements across your organization. Create easily accessible preconfigured templates and pre-approved clauses for non-legal users to leverage during negotiation to increase compliance with standardized language. Increase contract oversight and reduce time spent searching for individual agreements with a centralized, searchable repository for contracts.

Understand what's in your agreements

Whether for due diligence, compliance audits, or business analysis, understand what's in volumes of agreements quickly and thoroughly with industry-leading contract AI. Leverage pre-built, customizable machine learning models that automatically identify relevant clauses so legal teams can search and filter by concept – to find and compare critical terms easily.
